Sashank Solasa

Computer Science Undergraduate (2023–2027)
sashanksolasa@gmail.com — +91 9642650007 — LinkedIn — GitHub — Portfolio — LeetCode

About Me

Computer Science undergraduate at VIT-AP (2027) who enjoys building applications that solve real problems, from Flutter mobile apps to React.js web applications and Java-based backend services. Experienced in Java, OOP, REST APIs, API integration, Git, and DSA, with hands-on projects involving mobile features, interactive interfaces, and database-driven systems. Strong problem solver with a curiosity for learning new technologies and turning ideas into working applications.

Education

B.Tech in Computer Science and Engineering 2023–2027
VIT, Amaravati CGPA: 8.53/10.0

Class XII (BIEAP) 2023
Sri Chaitanya Junior College, Vijayawada Percentage: 96.5%

Class X (BSEAP) 2021
Sri Chaitanya Techno School, Devarapalli Percentage: 99%

Technical Skills

- **Programming Languages:** Java, Python, JavaScript **Frontend:** HTML5, CSS, React
- **Backend & APIs:** Spring Boot, Spring Security, Spring Data JPA, RESTful APIs, JWT, Microservices Architecture
- **Databases:** PostgreSQL, MySQL, MongoDB **Mobile Development:** Flutter
- **Cloud (AWS):** EC2, S3, RDS, Lambda, IAM, DynamoDB **Data & ML Libraries:** NumPy, Pandas, Scikit-learn, Matplotlib
- **Tools & Build:** Git, GitHub, Maven, JUnit, Mockito, Postman, Docker, CI/CD, JMeter, Claude Code, Apache Kafka
- **Core Computer Science:** Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Requirements Gathering, System Design(Basics)

Projects

SkillSwap — Flutter, Spring Boot, PostgreSQL, JWT April 2026 GitHub

- Peer-to-peer skill exchange App where users list skills they offer and seek across 7 categories, get matched with compatible peers, and manage exchange requests end-to-end.
- Built a skill matching engine using Spring Boot and PostgreSQL, exposing 20+ REST endpoints spanning matching, exchanges, session scheduling, completion tracking, and a post-session rating system.
- Secured all endpoints with JWT authentication and role-based access control, ensuring users only access their own exchanges and sessions.

Wayfinder — React, Spring Boot, PostgreSQL, PostGIS, Docker June 2026 GitHub

- A mini Google Maps route planner: pick any two points in a city and it returns the roads a car could actually take, computed over a live OpenStreetMap road network with a custom **Dijkstra** implementation built from scratch on a min-heap.
- Implemented a Spring Boot backend that loads the full road graph into memory at startup, cutting route computation to under 100ms by eliminating repeated database round-trips per request.
- Extended the same engine with a bidirectional search variant, **Yen's k-shortest-paths** for genuinely distinct alternate routes, and a cutoff traversal powering an isochrone endpoint that returns every road reachable within a travel-time budget, all exposed via a clean REST API.

NetRace — Spring Boot, React, Vite Sep 2026 GitHub

- Built a tool where you paste in a website's URL and it shows exactly how fast that site really responds, breaking the load time down into real steps: DNS lookup, TCP connection, TLS handshake, time to first byte, and download time.
- Made sure every number comes from an actual request to the site, nothing is guessed or estimated and added security checks so the tool can't be tricked into attacking internal or private networks.
- Built a visual "waterfall" chart to see the breakdown for one website, plus a comparison view to check up to 5 websites side-by-side and see which one is faster and why.

Certifications

- **Java Spring Framework, Spring Boot**. Udemy
- **AWS Academy Cloud Foundations**. Credly
- **Docker**. Udemy
- **PostgreSQL**. Udemy

Positions of Responsibility

- **ACM Student Chapter, VIT-AP** — Technical Team Core Member; organized technical events, workshops, and coding activities.
- **Photography Club, VIT-AP** — Core Member; conducted and participated in photography workshops and photowalks.
- **Gamers Grid Club, VIT-AP** — Photography Lead; covered club events and tournaments with 100+ participants per event.
- **Kings House, Sri Chaitanya Techno School** — House Captain; led and coordinated 400+ students across house activities, competitions, and school events.
