Summary

CS undergrad at VIT-AP who treats every new technology as a puzzle worth solving. Passionate about DSA and building scalable backend systems, with a keen interest in exploring new tools and frameworks beyond the classroom.

Education

Bachelor of Technology in Computer Science and Engineering — India
VIT-AP University — *2023 – 2027*

- CGPA: 8.45 / 10.0

Intermediate (Class XII – Senior Secondary) — India
Board of Intermediate Education, Andhra Pradesh (BIEAP), Sri Chaitanya Junior College, Vijayawada — *2021 – 2023*

- Percentage: 96.5%

Skills

Programming Languages: Java, Python, JavaScript
Frontend: HTML, CSS, React
Backend & APIs: Spring Boot, Spring Data JPA, RESTful APIs
Databases: MySQL, PostgreSQL, MongoDB
Tools & Platforms: Git, Docker, AWS, Postman
Core Computer Science: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

TaskHive — **Github Link**:

- Developed a full-stack task management application using **React 18**, **Spring Boot**, and **PostgreSQL** with secure JWT-based authentication.
- Implemented project and task management features including task assignment, priority tracking, status updates, and team collaboration.
- Built RESTful APIs with **Spring Security**, **Hibernate/JPA**, and role-based access control.
- Designed responsive frontend interfaces with **TypeScript**, **Tailwind CSS**, and **React Router**.

SkillSwap - Community Skill Exchange Platform — **Github Link**:

- Developed a REST API backend for a community skill exchange platform using **Spring Boot**, **PostgreSQL**, and **JWT authentication**.
- Implemented features for skill matching, user skill management, and skill exchange requests with role-based access control.
- Designed database entities and relationships for users, skills, exchanges, ratings, and teaching sessions.

Movie Web Application — **GitHub Link**:

- Built a responsive movie browsing application using **React 18** and **Vite**, integrating data from the **TMDb API**.
- Implemented movie search functionality with client-side filtering and dynamic rendering using reusable components.
- Utilized **Fetch API** for asynchronous data handling and added loading states for improved user experience.
- Designed a clean, responsive UI using **CSS Grid** for optimal viewing across devices.

Leadership & Activities

ACM Student Chapter, VIT-AP: Technical Team Member; organized technical events, workshops, and coding activities.

GeeksforGeeks Club, VIT-AP: Social Media Team Member; contributed to content creation and community engagement. Solved 50+ problems on GFG.
LeetCode: Solved 150+ problems across Data Structures and Algorithms; focused on arrays, trees, and dynamic programming.
